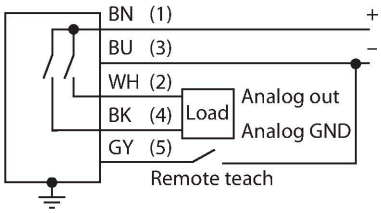
Wiring diagram



Functional principle

The Q4X is a laser-distance sensor working on the principle of laser triangulation. It has a range of 25…100 mm, a resolution of up to 0.15 mm and an analog laser class 1 power output (0…10 VDC).
With the dual mode functionality, the Q4X captures not only distances but also the light intensity that is reflected by an object. This unique feature allows lasers to be used for applications that would have been inconceivable before this.
In RUN mode, you can change the switchpoint, adjust light and dark-switching and teach the sensor accordingly. In SETUP mode, you can select teach, all standard
