Functional principle

The rugged multifunction TL30 base is available in many variations and is easily mounted. Each signal tower can be assembled with two to five varicolored LEDs, with or without a beeper. Clearly visible status displays for indoor and outdoor applications. The wiring diagram shows a PNP pin assignment.

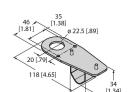

5 colors are available, blue (B), green (G), red (R), yellow (Y) and white (W), which specify the light sequence from bottom to top in the type designation of the tower light. Example: TL30BGYRXXNXQDQ designates the colors green, yellow and red from bottom to top.
